

STAND UP TO DOMINION'S DIRTY ENERGY MILLIONS

SATURDAY, 3/24

For years, Dominion Virginia Power executives have been raking in millions while using their dirty energy money to buy political power. They've been making backroom deals to rig the rules for fossil fuels and for themselves.

They generate ZERO electricity from wind or solar power but they've bamboozled our state-mandated electricity rates to include a whopping \$76 million renewable energy reward. And that's just one example of their exploitation.

Virginians are outraged by this and Dominion needs to know it. If this is what business as usual looks like, then business as usual has to stop before the planet cooks.

On Saturday, 3/24 at 12 pm, join the rally in Kanahwa Plaza in downtown Richmond, followed by a march around Dominion's headquarters.
